MAGNETIZER®

Feeling underpowered?

Unleash your engine's horsepower

**INCREASED HORSE POWER
INCREASED FUEL ECONOMY
REDUCED EMISSIONS**

**MOTORCYCLE FUEL
ENERGIZER**

MOTORCYCLE FUEL ENERGIZER

Congratulations on your purchase of the Magnetizer® Motorcycle Fuel Energizer (MFE), and welcome to the world of magnetic free energy. This unique product is a technological break-through, resulting from over two decades of research and development. Using the MFE System will save you money at the pump with increased mpg/kpl and on the road by delivering high octane performance from less costly octane fuel.

Energizer System Installation

Installation for Smaller Bikes with Limited Fuel Line

MAGNETIZER DOUBLE-CLAMP ENERGIZER UNIT

2 MAGNETIZER FUEL UNITS

1. Insert one strap through holes. DO NOT TIGHTEN FULLY leaving approximately a one inch adjustment loop. Place the two fuel units around the fuel line

MAGNETIZER DOUBLE-CLAMP ENERGIZER UNIT

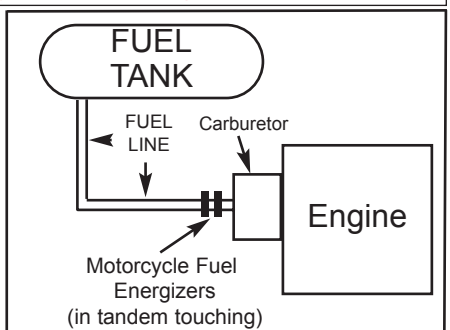

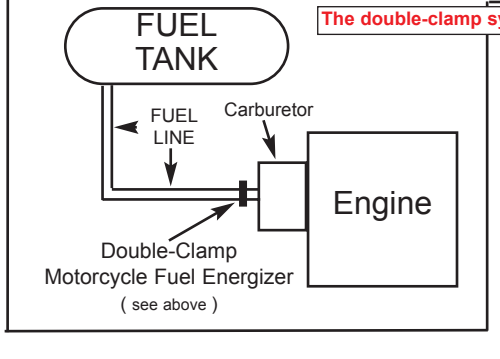

2 MAGNETIZER FUEL UNITS

2. Insert second strap through remaining holes in the two fuel units and tighten both straps until the units are snug.

Do not over tighten.

The double-clamp system will take a longer period of time to stabilize

Installation for Larger Bikes with Ample Fuel Line

MAGNETIZER BACK-PLATE ENERGIZER UNIT

MAGNETIZER BACKING PLATE

1. Insert one strap through holes. DO NOT TIGHTEN FULLY leaving approximately a one inch adjustment loop. Place fuel unit around fuel line

MAGNETIZER BACK-PLATE ENERGIZER UNIT

MAGNETIZER BACKING PLATE

2. Insert second strap through remaining holes in the Energizer and tighten both straps until the unit is snug.

Do not over tighten.

Units must be in tandem - touching each other
